

Aceasta lucrare cuprinde urmatoarele activitati:

- demontarea placii de trotuar existente;
- incarcarea si transportul materialului rezultat in urma demolarii, la groapa de depozitare aprobata;
- procurarea, transportul, depozitarea si manipularea materialelor si echipamentelor necesare;
- amplasarea placilor de trotuar;
- verificarea de final, cu scopul de a se asigura ca executia propriu-zisa a fost realizata in conformitate cu proiectu .

Dala de trotuar metalica inexistenta

The drawing consists of two parts: a longitudinal section at the top and a transverse section at the bottom.

SECTIUNE LONGITUDINALA - 1:3000

This section shows the bridge's profile along its length. It starts at 'Bucuresti' on the left and ends at 'Constanta' on the right. The bridge is divided into segments labeled P1 through P20, with a final segment labeled A2. The bridge has a curved approach on the left and a straight approach on the right. The scale is 1:3000.

SECTIUNE TRANSVERSALA PRIN POD (A-A) - 1:200

This section shows the bridge's cross-section at a specific point. It features a central span with a width of 34.40. The bridge is supported by two main piers. The deck is labeled 'Dala de trotuar metalica' (metal sidewalk deck). The scale is 1:200.

Dimensions shown in the transverse section:

- Span width: 34.40
- Deck width (left): 10.40
- Deck width (right): 10.40
- Deck width (total): 20.80
- Deck width (left sidewalk): 1.50
- Deck width (right sidewalk): 1.50
- Deck width (left sidewalk + deck): 12.30
- Deck width (right sidewalk + deck): 12.30
- Deck width (total with sidewalks): 24.60
